Masking & Citation Reporting-Why It's Important

Panelists: Ashley Schluck, Misty Zimmerman, Dustin Ragon

During this panel discussion find out how 'Masking' has become a problem amongst truck drivers and how crash reporting affects driver licensing efforts to keep problematic drivers off the road.

DUI Task Forces, Sustained HVE and Preventing Roadside Deaths

Panelists: Sheriff Brian Kozak, Chief Scott Peters, Lieutenant Eric Jorgensen, Law Enforcement Liaison Pete Abrams

A panel will discuss conducting effective occupant protection enforcement and reducing impaired driving crashes using DUI teams and crash data. Attendees will learn about free POST certified training that includes Below 100, Drug Recognition Expert, Advanced Roadside Impaired Driving Enforcement as well as an overview of the Traffic Incident Management Responder training.

Do You Want to Be the Best? Communicate!

Speaker: Sarah Garner

The best investigators are good communicators. The best witnesses are good communicators. The best trial lawyers are good communicators. This presentation will look at some methods to improve your skills and reap the benefits.

Working Lunch - A 3-Step Guide to Leveraging Owned, Earned and Paid Media

Laura Sonderup, Heinrich Marketing

Working Together to Prevent Impaired Driving – Darrin Grondel, Responsibility.Org

How it takes law enforcement, prosecutors, judges, treatment specialists, and prevention folks all working together to reduce/prevent impaired driving on a national level. Take people on a journey from what impaired driving looks like at a national level, provide break out and general sessions that educate on the things in between, and end with what we are doing or can do at a local level.

WY DECP Program Update and Coordinator Introduction

Fentanyl: Looking at the Layers of a Deadly Epidemic

This class will discuss what Fentanyl is and how it enters the United States. We will discuss the different forms of Fentanyl and how it is associated in other synthetic trends. This presentation will cover the different ways Fentanyl is ingested into the human body along with the signs and symptoms. Furthermore, we will go into the observations of overdose and withdrawal. Finally, the presentation will cover Narcan, social media and close with a case study.

Joint Ventures: Navigating the Hazy Landscape of Cannabis

This session covers street-level trends and influences that have arisen with the arrival of marijuana legalization. It will show examples from different states that have legalized marijuana, including: new products, trends, signs of impairment and marijuana related times. It will also provide information on CBD, Delta 8 and 10 and what are the differences between these products and marijuana and how do we know what is being sold in “head-shops” is not marijuana.

Working Lunch – Special Presentations and Impaired Driving in a Rural Environment Panel

This panel discussion and Q&A session will bring together a diverse group of professionals to provide insight into the unique challenges their profession experiences as a result of a DUI arrest and strategies they deploy to successfully remove impaired drivers from Wyoming roadways.

Courtroom Testimony

DREs in need of instructor observed evaluations to recertify will be permitted to complete mock DRE evaluation(s) with an instructor.

DRE Data Training

Discussion of DRE entries into the NHTSA DRE Database. Floor will be open for any questions and answers on the database, access to the system, and entry of evaluations into the database. There will be an additional discussion on future data entry systems (ITSMR) to help alleviate entry compliance issues with NHTSA's DRE Database.

A Mile High & Selling 'Shrooms – Preparing for the Sale of Hallucinogens

In Colorado, voters approved Proposition 122, which decriminalized certain psychedelic plants and fungi for personal use by individuals aged 21 and older and established the Regulated Natural Medicine Access Program for licensed healing centers to provide natural medicine services. Since its approval, Colorado has been dealing with the consequences of this measure, including the establishment of a regulated therapeutic system and the decriminalization of specific psychedelics. Drawing from the experience of marijuana legalization in the state, prosecutors and LEOs anticipate potential unintended consequences, such as a rise in illegal markets, impaired driving, and community impacts. Learn about Proposition 122, legislative responses, immediate effects, and the potential outcomes of Colorado's latest drug legalization encounters, offering insights for other states considering similar measure

Optional DRE Mock Eval session – WY DRE Instructors
