STATEWIDE TRANSPORTATION IMPROVEMENT PROGRAM (STIP) STATEWIDE TRANSPORTATION PLANNING PROCESS CERTIFICATION

In accordance with 23 CFR 450.218, the Wyoming Department of Transportation hereby certifies that its statewide transportation planning process is addressing major issues facing the State and its non-urbanized areas, and is being carried out in accordance with the following requirements:

1. 23 U.S.C. 134 and 135; 49 U.S.C. 5303 and 5304; and 23 CFR Part 450;
2. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21; 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex or age in employment or business opportunity;
3. Section 1101(b) of the FAST-Act (Pub. L. 112-141) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
4. 23 CFR part 230, regarding implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
5. The provisions of the Americans with Disabilities Act of 1990 (42 USC 12101 et seq.) and USDOT regulations "Transportation for Individuals with Disabilities" (49 CFR Part 27 (Nondiscrimination on the Basis of Disability in Programs or Activities Receiving Federal Financial Assistance); 49 CFR Part 37 (Transportation Services for Individuals with Disabilities (ADA)); and 49 CFR Part 38 (Americans with Disabilities Act (ADA) Accessibility Specifications for Transportation Vehicles); Sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;
6. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
7. Section 324 of title 23 U.S.C., regarding the prohibition of discrimination based on gender; and
8. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

INTRODUCTION

The Wyoming Department of Transportation utilizes a continuing and comprehensive planning process which encourages input from various sources to assist in determining transportation system project selections that will maintain and enhance Wyoming's Transportation system (see attached flowchart). WYDOT is taking advantage of new technologies that help identify the projects that will yield the highest return on investment by using a data-driven decision methodology that creates a system preservation focus for the Wyoming Transportation network. Input from engineering studies, performance management analysis, asset management systems, the public, the collective judgment of the Transportation Commission, and professional judgment of WYDOT engineers are used to select the transportation system projects that will be incorporated into the State Transportation Improvement Program (STIP). The STIP is not meant to serve solely as an accounting document; rather, it is a snapshot of expected projects and their schedules and is continually being updated.

The Wyoming STIP is a six-year, fiscally constrained program approved by the Wyoming Transportation Commission. The current STIP program is fiscally constrained for the years 2026-2031. The financial plan within the STIP is constrained based on projected federal and state funding availability. The actual funding level that will be available depends upon Congressional appropriations, as well as State appropriations. The STIP represents the planned construction, construction engineering, and preliminary engineering (which may include right of way, utility and/or environmental/NEPA costs) costs of the projects. It also includes the split between federal funding, state funding and other funding sources for each project. The Wyoming Department of Transportation's fiscal year runs from October through September.

WYDOT has seen a large increase in the cost of construction projects, nearly 50% more than in previous years. To ensure the STIP is fiscally constrained, all projects receive an updated estimate based on current construction costs.

Since both the nature of the projects and the funding sources are dynamic and subject to change, the STIP is inherently fluid. Scheduling projects for improvement is a very complex undertaking in that there are a large number of challenges that must be addressed prior to a project being sent to letting. Many of these challenges are outside of the Department's ability to predict or control at the time the project is initially programmed or scheduled. Some of the challenges faced are: funding source changes,

increases in construction costs, right-of-way acquisition delays, emergencies and environmental issues. Wyoming is continually faced with cost volatility for construction materials, such as oil, steel, cement and some sources of aggregate. Changes to the STIP are approved by the Transportation Commission.

WYDOT pledges to do its best to adhere to this program and to serve the public interest through these projects. WYDOT values your input, advice and support. Any significant changes in either revenues and/or expenses will result in adjusting the schedule of projects.

This document is divided by county alphabetically. The section entitled “Various” includes projects with locations in more than one county. Maps of the seven Transportation Commission Districts, five Aeronautics Commission Districts as well as the Transportation Department’s five Construction and Maintenance Districts are included for reference purposes. The map for each county indicates projects scheduled for construction in Fiscal Year (FY) 2026 and future years. City inset maps indicate projects within urban areas in FY 2026 and future years. Project locations are depicted at the approximate midpoint of the project length. Various location projects are not mapped; however, locations can be provided upon request.

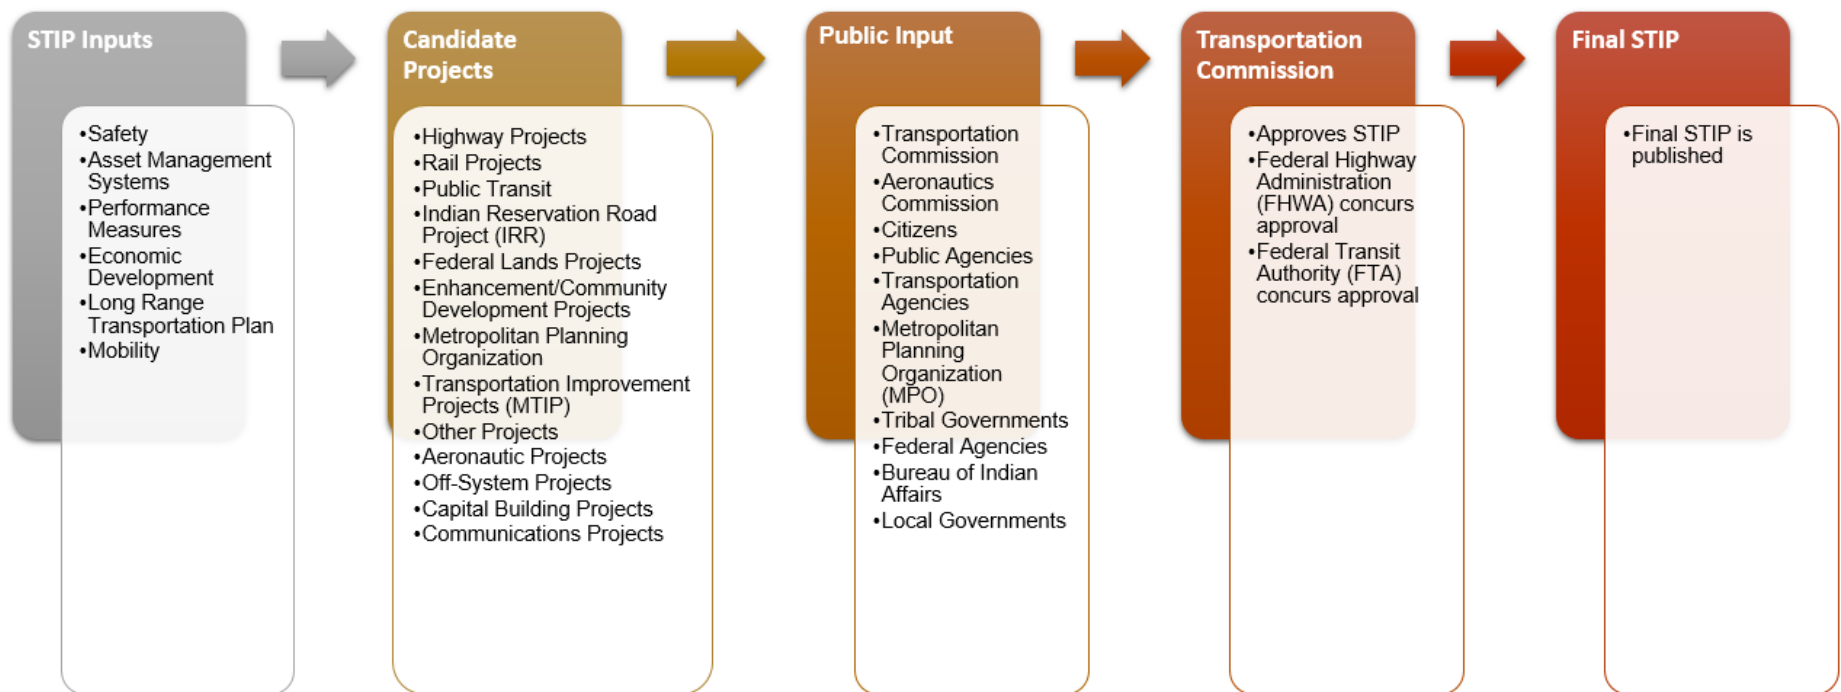

Aeronautics and capital improvement projects are shown at their locations for FY 2026 and future years. Transit projects are shown in their associated town or city. These project types are depicted by symbolic icons. Project numbers specific to these locations are shown in the affiliated tables and not on the county or city inset maps.

For an interactive view of the projects in the STIP go to: <https://webapp.dot.state.wy.us/ao/f?p=951:1:116133076854266>.

For an online view of the STIP follow the link: <http://www.dot.state.wy.us/STIP>

If you would like to receive a copy or change the number of copies you receive of next year’s STIP publication, or have recipient name/address corrections, please send this information to the following email address, so we can update our records: dot-stipoffice@wyo.gov

ELEMENTS COMPRISING THE WYOMING STATE TRANSPORTATION IMPROVEMENT PROGRAM (STIP)

PUBLIC INVOLVEMENT

The Wyoming Department of Transportation utilizes an extensive public involvement process for development and implementation of the STIP. Once projects have been identified in the planning process and proposed for inclusion in the STIP, the document is released for public review and comment. WYDOT reviews the proposed STIP with the public in the early summer of each year at a number of meetings throughout the state, often using open house style forums in individual counties. After the initial input has been received, a draft STIP is advertised and made available for public comment for a minimum of 30 days, beginning in August. The STIP is then ultimately presented to the Transportation Commission, with the received comments, at its September meeting.

Public involvement activities inform the public and gather information about concerns and impacts a project, or a potential project, may have upon affected communities. WYDOT evaluates these impacts at each step of the transportation life cycle, including within its long range plan, project selection process, project alternatives analyses, construction, maintenance, and performance monitoring. Additionally, special care is taken after a project has been selected to safeguard against smaller communities being disproportionately impacted by the project.

Information on the STIP, public meetings, a STIP presentation recording, and copies of the STIP can be found on the WYDOT website at <https://www.dot.state.wy.us/STIP>. Included on the website is an interactive map showing the proposed highway project locations, and a recording of a STIP presentation. The interactive map allowed the public to provide comments on specific projects, or to provide generic or location specific comments or concerns. The interactive map and associated comments could be found at <https://webapp.dot.state.wy.us/ao/f?p=951:1:116133076854266>.

STIP AMENDMENT PROCESS

The STIP is a six-year program of projects that is updated annually and approved by the Transportation Commission each year in September. The Department views this document as a planning guide that best represents the transportation needs and funding assumptions at the time of STIP approval.

Changes in state and federal funding, changes in construction cost, re-evaluation of priorities, changing economic conditions and changes in conditions of roadway assets can and do occur during the year. The Department has established an internal STIP amendment process that is responsive to these changing conditions.

This process enables the Department to adjust project scope and scheduling to meet changing priorities, to add or move projects because additional funds have been identified, or to add or advance projects that have received special funds (grants, etc.) during the planning year. Proposed amendments are reviewed internally by the staff and recommendations are presented to the Transportation Commission for approval on a monthly basis. The FHWA approves the four years of the STIP. Their view is that any of the projects in the second through fourth year may be advanced for federal funds and commitment without requiring an amendment to the STIP. WYDOT requires an internal STIP amendment when projects are: (1) added to the STIP; (2) deleted from the STIP; (3) modified due to substantial changes in the termini of the project or (4) updated due to significant change in the cost or scope of the projects.

The FHWA also states that the WYDOT can obligate funds from any of the various FHWA funding program sources without necessitating a STIP amendment.

OTHER PROGRAM FUNDS

- **Tribal Transportation Program:** The Tribal Transportation Program projects are not included since their submittal was not received prior to the printing of this document.
- **Metropolitan Transportation Improvement Programs:** The Casper Metropolitan Improvement Program (MTIP) and the Cheyenne MTIP for Fiscal Years 2026-2029, and as amended, are included in the STIP by reference, and are available at:
Casper MTIP:

https://www.casperwy.gov/residents/roads_and_parking/metropolitan_planning_organization

Cheyenne MTIP:

<https://www.plancheyenne.org/transportation/transportation-improvement-program/>

The transit dollar amounts shown in both the narratives and on the county pages do not reflect the entire amount for each MPO. These amounts shown in the STIP represent the State local share. For total Program amounts refer to the Community's MTIP.

- **Federal Land Highway Programs:** Wyoming is administratively assigned to Central Federal Lands and Western Federal Lands, but projects are occasionally assigned to Eastern Federal Lands. Federal Lands Transportation Improvement Program projects are included in the STIP by reference, and are available at:

<https://highways.dot.gov/federal-lands/planning/tip/cfl-transportation-improvement-program>

<https://highways.dot.gov/federal-lands/planning/tip/wfl-transportation-improvement-program>

* Includes contract lettings and other federal and state mandated programs.

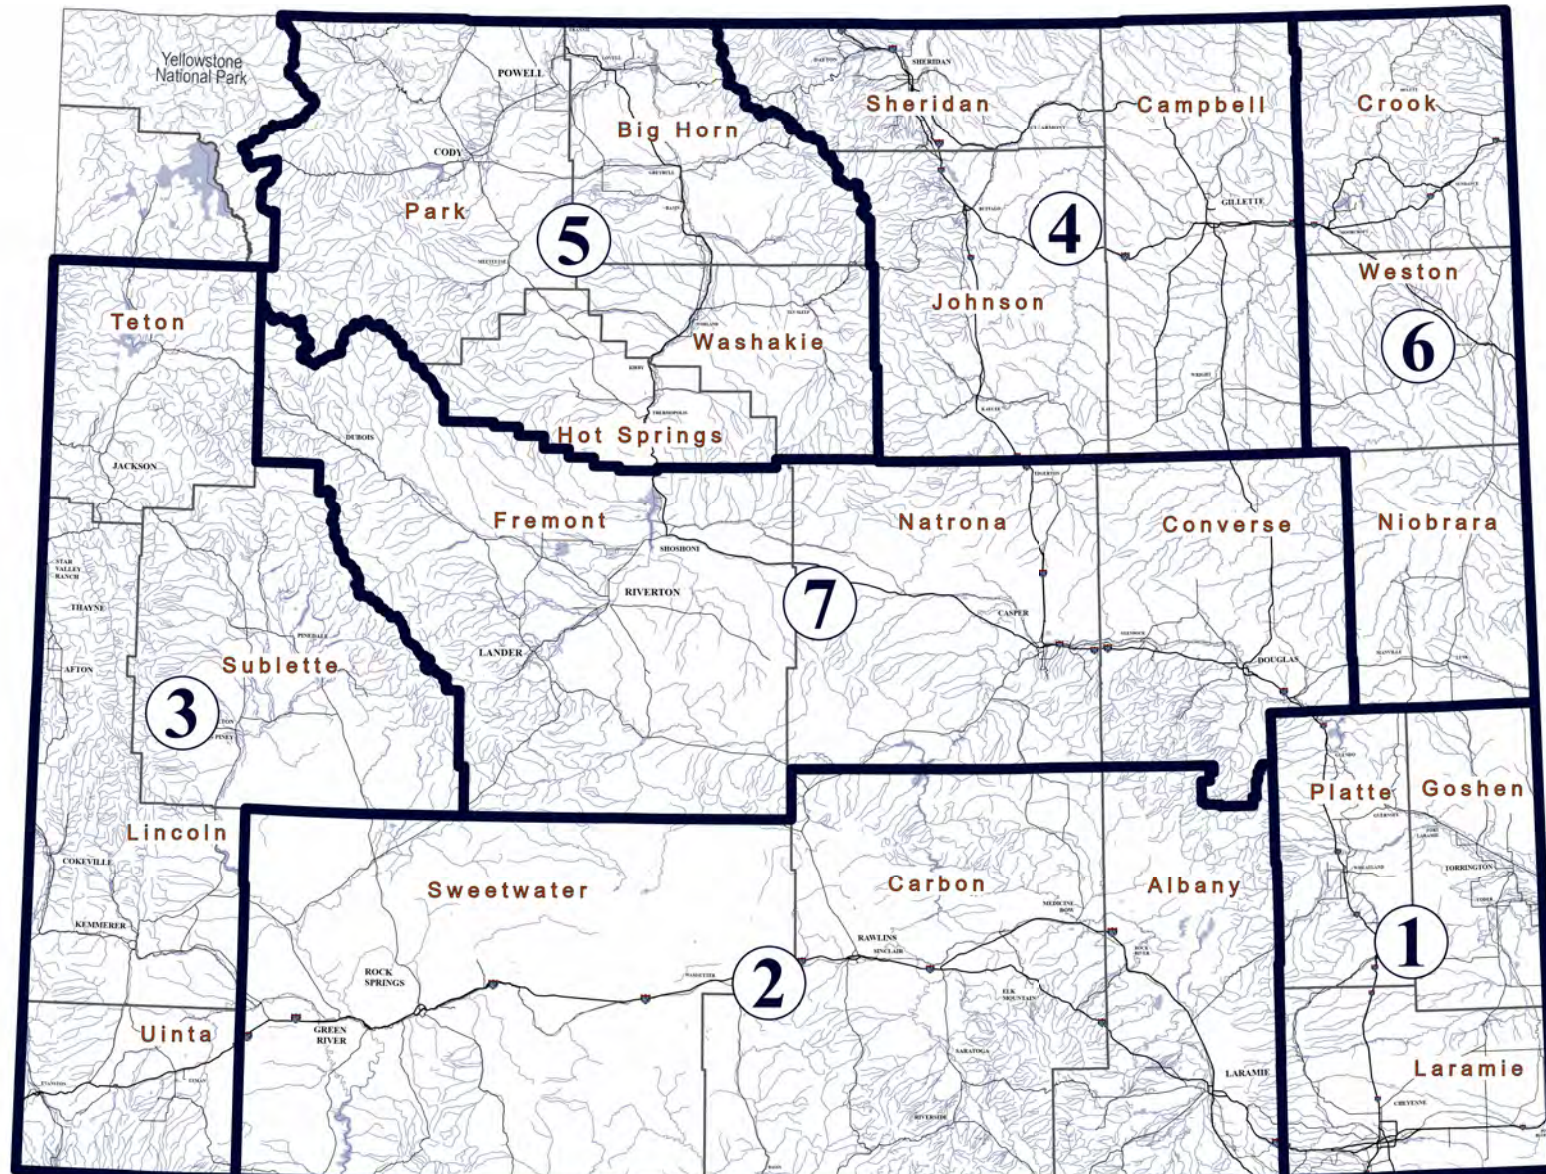

**Funds include Non-Formula funding OA which will be obligated on projects in future years, which includes Bridge Formula program & Discretionary Grants.

COMPETITIVE GRANT PROGRAMS

The United States Department of Transportation and FHWA offer a variety of competitive grant programs used to fund various types of transportation projects and activities. WYDOT will list grants received by agencies within the state. In 2025, the following project(s) were selected:

There are no competitive grants at this time.

TRANSPORTATION ASSET MANAGEMENT

In compliance with the requirements set forth in 23 U.S.C. 119, the Moving Ahead for Progress in the 21st Century Act (MAP-21), and the Bipartisan Infrastructure Law (BIL) (§ 11105), WYDOT has implemented a risk-based Transportation Asset Management Plan (TAMP) focused on infrastructure preservation. Transportation asset management is a long-term, multi-disciplinary approach to managing infrastructure assets through the use of regular planned investments to maintain and extend the service life of Wyoming's roadways and bridges. The objective of WYDOT's preservation-based asset management approach is to keep the transportation network at the highest possible condition levels given finite funding and limited resources.

WYDOT's transportation asset management strategy is a performance-based planning process that links investment decisions to anticipated asset condition improvements. STIP projects are programmed to provide the greatest return on investment for the transportation network based on a systematic approach to timely maintenance, preservation, rehabilitation and replacement activities. Successful asset management practices ensure that infrastructure assets continue to operate at their highest possible service level, and regular planned investments are the optimal way to extend the service life of the State's roadways and bridges at the least cost to the agency and public. Projects included in the STIP are those that facilitate progress towards meeting the State's national performance goals for infrastructure management, safety enhancements, congestion mitigation, system reliability, freight movement and economic vitality, environmental sustainability, and reduced project delivery delays.

WYDOT relies on recommendations from its pavement and bridge asset management systems (PMS, BMS) to program STIP projects. Roadway and bridge candidates and work types are selected based on alignment with the investment strategies outlined in WYDOT's TAMP, and promote system-wide asset condition sustainability. Timely application of preventive and rehabilitative treatments (proactive versus reactive) ensures that transportation assets continue operating in the best possible condition and lessens the impacts of deterioration and usage over time. To meet its national performance targets, WYDOT invests a minimum of \$185 million annually for pavements, and \$35 million annually for bridges. Typical STIP expenditures exceed this amount when funding is available. Specifically, WYDOT has recently received extra federal funding for bridge replacements under the new Bridge Formula Program (BFP), which accounts for the additional expenditure for bridges. The chart above depicts a snapshot of WYDOT's planned resource allocations for the current STIP years (2026-2031).

Federal transportation performance targets are reported to the Federal Highway Administration (FHWA) on a 4-year cycle and may be adjusted at the 2-year midpoint. FHWA's Transportation Performance Management (TPM) Website shows WYDOT's current progress towards meeting these targets, which can be accessed at the following link:

<https://www.fhwa.dot.gov/tpm/reporting/state/state.cfm?state=Wyoming>. WYDOT's performance targets and actual conditions have been summarized in the table below:

Wyoming 2024 Mid Performance Period Significant Progress Determination Results

Measure Area	Performance Measures	Target	FY2024 Actual	Target Met?
The Condition of Pavements on the Interstate	% of Interstate Pavements Classified as in Good Condition	40.0	60.4	Yes
	% of Interstate Pavements Classified as in Poor Condition	5.0	1.0	Yes
The Condition of Pavements on the NHS (excluding Interstate)	% of Non-Interstate NHS Pavements in Good Condition	40.0	60.5	Yes
	% of Non-Interstate NHS Pavements in Poor Condition	10.0	0.7	Yes
The Condition of Bridges on the NHS	% of NHS Bridges Classified as in Good Condition	10.0	22.1	Yes
	% of NHS Bridges Classified as in Poor Condition	10.0	5.9	Yes
The Performance of the National Highway System	Interstate Time Travel Reliability Measure	96.0	100.0	Yes
	Non-Interstate Time Travel Reliability Measure	88.0	88.6	Yes
Freight Movement on the Interstate System	Freight Reliability Measure	1.28	1.24	Yes

Source: FHWA TPM SPD Notification Report

For Interstate pavements, WYDOT has set a performance target on its Interstate system at greater than 40% in good condition, and less than 5% in poor condition. For the non-Interstate National Highway System (NHS) system, WYDOT's target is to have greater than 40% in good condition, and less than 10% in poor condition. These pavement targets were established based on full distress plus International Roughness Index (IRI) data. WYDOT continues to meet its pavement performance targets for both Interstate and NHS systems.

Bridge performance targets have been set at maintaining 10% of all NHS structures in good condition (measured by area of deck square footage), and less than 10% in poor condition. Expected funding levels and recommendations from the Bridge Management System (BMS) were used to establish these targets, with the goal of maintaining bridges in a healthy condition within the given budget constraints. WYDOT has been meeting its bridge performance targets for the NHS system.

For system reliability, WYDOT measures the Level of Travel Time Reliability (LOTTR) of its transportation system and calculates the percentage of person-miles travelled on the Interstate and non-Interstate NHS that are considered reliable. WYDOT has set its performance targets for system reliability at greater than 96% for Interstates, and greater than 88% for non-Interstate NHS routes. The national performance measure as it pertains to freight movement and economic vitality uses a measure of Truck Time Travel Reliability (TTTR). The TTTR Index is a ratio of the 95th percentile truck travel time to the 50th percentile truck travel time, which constitutes the time delay (a lower index value is preferable). For Wyoming, most of the time delay for trucks is due to winter weather conditions and construction, very little of which is actually attributable to congestion as such. For freight movement, WYDOT has set its TTTR index performance target at 1.28.

Wyoming does not experience issues of congestion and is not required to report the national performance metric for congestion mitigation, or Peak Hour Excessive Delay (PHED). The PHED performance measure is only applicable to urbanized areas or Metropolitan Planning Organizations (MPO's) with populations exceeding one million people and located in a federally designated nonattainment or maintenance area for ozone, carbon monoxide (CO) or particulate matter. Similarly, Wyoming does not suffer from air quality or pollution issues to the same extent that larger states or major metropolitan cities do. The main contributors to air pollution in the two nonattainment areas of the State are not transportation-related; therefore, WYDOT utilizes its Congestion Mitigation and Air Quality Improvement (CMAQ) program dollars towards dust mitigation in other areas with higher particulate matter or pollutant levels that could potentially lapse into nonattainment status. WYDOT's CMAQ performance target, based on a

CMAQ Emissions Reductions (kg/day), has been set at zero.

In addition to maintaining infrastructure conditions, improving the safety of the travelling public continues to be another top priority for WYDOT, with the aim of selecting safety treatments that effectively reduce fatalities and serious injuries. To this extent, WYDOT has set its current safety performance targets (based on a 5-year rolling average) as follows: Fatalities – 128, Fatality Rate – 1.35, Serious Injuries – 450, Serious Injury Rate – 5.0, and Non-motorist Fatalities and Serious Injuries (pedestrian and bicyclists) – 30. While actual safety statistics are reported on an annual basis for the preceding fiscal year, there is typically a lag between data submittal and validation; therefore, the data in the subsequent chart reflects the most recent safety data available. Safety targets were established in coordination with WYDOT’s safety partners and the State Highway Safety Plan (SHSP). The actual safety performance measures were obtained from WYDOT’s State Highway Safety Report, which is located on FHWA’s Transportation Performance Management (TPM) Website:

<https://www.fhwa.dot.gov/tpm/reporting/state/safety.cfm?state=Wyoming>.

WYDOT’s safety performance progress based on the latest FHWA Safety Performance Target Assessment has been summarized below:

Wyoming Safety Performance Target Assessment			
Performance Measure	2022 Target	2022 Actual	Target Met?
Number of Fatalities	128.0	134	No
Rate of Fatalities	1.350	1.44	No
Number of Serious Injuries	450	481	No
Rate of Serious Injuries	5.00	5.16	No
Number of Non-Motorized Fatalities & Serious Injuries	30.0	40	No

Source: FHWA TPM reporting website

A more comprehensive analysis of WYDOT’s bridge and pavement conditions and targets, investment strategies, and anticipated STIP expenditures has been covered in detail in WYDOT’s certified 2022 TAMP document, which can be accessed at the following link: <https://www.dot.state.wy.us/files/live/sites/wydot/files/shared/Planning/Transportation-Plans/2022%20WYDOT%20TAMP%20FINAL.pdf>.

TRANSPORTATION PROJECTS CHARACTER OF WORK

Character of Work	Description	Examples
ADA IMPROVEMENTS	Work to address pedestrian access and mobility	Wheelchair ramps, curb ramps, correcting uneven surfaces, installation of truncated domes
ADDITIONAL LANES	Projects to improve capacity and/or mobility	Passing lanes, additional through lanes, truck lanes, climbing lanes, multi-lanes
BRIDGE REPLACEMENT	Replacement of existing bridge	New bridge, large culvert, or reinforced box culvert
COMMUNITY DEVELOPMENT	Enhancements projects (non-highway related work)	Pedestrian and bicycle facilities, recreational trails, pathways, safe routes to school projects, community improvements, environmental mitigation related to transportation, entry signs, decorative railing or lighting
DRAINAGE REPAIR	Work to address erosion, flood, or other water related damage	Flood repairs to slopes, riprap repair or replacement, pipe inlet or outlet repairs, cleaning out culverts and ditches, replacing damaged culverts, debris removal
ENVIRONMENTAL	Projects to address environmental issues	Wetland mitigation or monitoring, dust suppression, wildlife crossing, fish passage
FENCING	Projects to address fencing needs	Add, replace or repair fence, deer/wildlife fence, right-of-way fence
GENERAL MAINTENANCE	Work to address maintenance or preservation needs	Aggregate, salt/sand supply

Character of Work	Description	Examples
GRADING	Dirt work only, no paving	Adding dirt shoulders, safety grading for guardrail, flattening slopes
GUARDRAIL	Work to provide protection of obstructions within the highway clear zone	Add, replace or repair guardrail, w-beam or box beam guardrail, concrete barrier (permanent or temporary), end treatments, crash cushions, cable rail
ITS	Intelligent Transportation System work	Dynamic message signs, variable speed limit signs, RWIS stations, web cameras, ice detection, special software
LIGHTING	Work to install lights to improve safety at interchanges, intersections, roads, etc.	High mast tower lights, interchange and intersection lighting, decorative lights
MODIFY INTERCHANGE	Highway interchange modifications	Ramp modifications, adding ramps, removing ramps, modify geometrics
MODIFY INTERSECTION	Highway and street intersection modifications	Modify intersection geometrics, signal additions or upgrades, turn lanes
NEW CONSTRUCTION	Work to build a new roadway or bridge on a new alignment	New roadway or bridge in a location that did not previously have one
PARKING	Projects to address need for vehicle parking	Truck parking areas, tourist pull out areas, parking lots
PAVEMENT MAINTENANCE	Preserve existing pavement surface	Crack seal, pothole patching, machine placed patching, joint seal, slab replacements, grinding, dowel bar retrofit

Character of Work	Description	Examples
PAVEMENT REHABILITATION	Correct functional and structural pavement deficiencies	Mill and/or leveling followed by overlay, crack & seat followed by overlay, isolated reconstruction, white topping
PAVEMENT RESURFACE	Correct functional pavement deficiencies (IRI/rutting/thermal cracking)	Thin overlay, microsurface, chip seal
PORT OF ENTRY	Projects to address needs at Ports of Entry	Work in and around a port of entry including buildings, parking lot, scales, lighting, signing
RAILROAD	Projects dealing with at-grade railroad crossings	At grade railroad crossing modifications, electrical, signs, quiet zones, circuitry
RECONSTRUCTION	Work to rebuild or expand current roadway or bridges	Removing and rebuilding roads and structures
REST AREA	Projects to address needs at Rest Areas	Work in and around rest areas including building, parking lot, water, electrical, lighting, and septic systems, signing
SAFETY IMPROVEMENTS	Projects to address vehicle crashes and safety and/or mobility of the highway system	Curve warning signs, roadway striping, no passing signs, high friction wearing surface, turn lanes, acceleration and deceleration lanes, pedestrian crossings, shoulder widenings
SLIDE REPAIR	Work to address geotechnical issues dealing with landslides, rock fall, and slope movements	Toe berms, mechanical slide fixes (shear keys, mechanical anchors, shear piles), rock fall mesh, rock fall mitigation, scaling

Character of Work	Description	Examples
SNOW FENCE	Addition, removal or rehabilitation of snow fence	Install, rehabilitate, recycle snow fence
STRUCTURE REPAIR	Work to address structure conditions or preservation	Deck overlay; deck replacement; expansion joint modification; painting; concrete repairs; riprap repairs; slope repairs; bearing device repair or replacement; damage repairs; rehabilitation to large culverts, overhead sign structures, and retaining walls
STUDIES	Projects that may or may not lead to construction	Bridge inspection, bridge and pavement management systems, liaisons, studies, planning documents
TRAFFIC SYSTEMS	Projects to improve traffic movements	New or replacement signal poles and devices, signing, signal heads, overhead signs and structures, pedestrian crossing devices, detection
UTILITY	Work to add, replace, relocate, and upgrade utilities within the roadway right of way	Adding or relocation power, cable, phone, gas, pipelines, relocating towers or poles, storm drain systems

METROPOLITAN PLANNING ORGANIZATIONS

WYDOT works in conjunction with two Wyoming Metropolitan Planning Organizations (MPO's) in Cheyenne and Casper to develop transportation improvement projects into the STIP that help achieve performance targets within the designated MPO planning areas. Performance-based planning encourages MPO's to monitor the performance of their respective metropolitan systems to direct resource allocations to those areas where improvements are most needed, and which facilitate progress towards meeting their identified performance targets. The MPO condition data for pavements, bridges, level of travel time reliability and truck travel time reliability are generated by WYDOT to ensure that performance targets are being actively achieved for the entirety of the National Highway System (NHS) within the state.

Transportation Performance Management (TPM) targets for MPO's are established every four years. Both the Cheyenne and Casper MPO's have chosen to adopt performance targets that correlate with WYDOT's own transportation system performance targets. WYDOT maintains all MAP-21 federal condition thresholds for Federal TPM reporting of the Interstate and NHS, regardless of whether the facilities are located within a respective MPO boundary. WYDOT and the MPOs also work together to meet all transportation and transit-related performance measures as required by the FAST Act under Federal Transit Administration (FTA) regarding safety and transit asset management.

MPO Performance Target Assessment

Performance Area	Measure	Cheyenne MPO Target	Cheyenne MPO Condition	Casper MPO Target	Casper MPO Condition
PM1 – Safety	Number of Fatalities	128	125.8	128	132.4
PM1 – Safety	Rate of Fatalities	1.35	1.246	1.35	1.39
PM1 – Safety	Number of Serious Injuries	450	425.2	450	453.4
PM1 – Safety	Rate of Serious Injuries	5.0	4.204	5.0	4.77
PM1 – Safety	Number of Non-Motorized Fatalities & Non-Motorized Serious Injuries	30	31.6	30	33
PM2 – Pavement	% of Interstate Pavement in Good Condition	40%	61.5%	40%	60.4%
PM2 – Pavement	% of Interstate Pavement in Poor Condition	5%	1%	5%	1%
PM2 – Pavement	% of Non-Interstate NHS Pavement in Good Condition	40%	42.2%	40%	42.1%
PM2 – Pavement	% of Non-Interstate NHS Pavement in Poor Condition	10%	1.1%	10%	1.1%
PM2 – Bridge	% of NHS Bridges in Good Condition	10%	22.9%	10%	22.1%
PM2 – Bridge	% of NHS Bridges in Poor Condition	10%	4.3%	10%	5.9%
PM3 – Reliability	% of Person-Miles Traveled on the Interstate System that are Reliable	96%	99.9%	96%	100%
PM3 – Reliability	% of Person-Miles Traveled on the Non-Interstate NHS System that are Reliable	88%	91.8%	88%	88.6%
PM3 – Freight	Truck Travel Time Reliability Index	1.28	1.22	1.28	1.24
Transit – Rolling Stock	% of Transit Rolling Stock Exceeding Useful Life Benchmark (% in Poor SGR)	60%	18.0%	45%	47%
Transit – Equipment	% of Transit Equipment Service Vehicles Exceeding Useful Life Benchmark (% in Poor SGR)	65%	100%	100%	100%
Transit – Facilities	% of Transit Facilities Rated Under 3.0 on the FTA TERM Scale (% in Poor SGR)	0%	0%	10%	5%

CAPITAL IMPROVEMENT PROJECTS

The Wyoming Department of Transportation (WYDOT) owns and maintains over 475 buildings throughout the state. Similar to the other state assets, Department staff annually review and prioritize the necessary maintenance, modernization, and capital construction needs. To better evaluate the overall condition of WYDOT facilities and make recommendations for preventative and predictive maintenance needs, as well as modernization and capital construction projects, WYDOT's facility management system is being upgraded to enhance the planning and prioritization of capital projects. Projects with a cost greater than \$15,000 are included in the STIP. Including the capital improvement projects in the STIP process will provide a single source review of the Department's projects.

ELEMENTS COMPRISING THE COMMUNICATIONS COMMISSION & WYOLINK STATEWIDE COMMUNICATION SYSTEM

TRANSIT INTRODUCTION

GENERAL

Congress establishes the legal authority to commence and continue Federal Transit Administration (FTA) programs through authorizing legislation covering several years. On November 5, 2021, Congress sent President Biden the IIJA for signature. The legislation reauthorizes surface transportation programs for FY2022-2026 and provides advance appropriations for certain programs.

The Wyoming Department of Transportation (WYDOT) acts as a facilitator of public transportation services. WYDOT does not directly provide public transportation services, but contracts for services with local, sub-grantee public transportation providers. WYDOT Transit Staff disseminates information about U.S. Department of Transportation programs and provides technical support to applicants in preparation of funding proposals. The WYDOT Transit Application Guidelines can be found at:

http://www.dot.state.wy.us/home/planning_projects/transportation_programs/transit-in-wyoming.html. Local governments and non-profit entities are responsible for the development and operation of their local transit systems.

FEDERAL TRANSIT ADMINISTRATION PROGRAMS

SECTIONS 5305(d) and 5305(e) PROGRAMS (Formerly 5303 and 5304)

These programs are for planning funds for Metropolitan and Statewide Rural areas to foster the development of coordinated community and regional transit planning. Metropolitan planning funds (Section 5305(d)) are provided to Casper and Cheyenne and are annually combined with FHWA Planning Funds to create the Consolidated Planning Grant (CPG). These funds are transferred to FHWA for administration. Statewide planning (Section 5305(e)) is made available to both municipalities and small rural areas for their transit planning needs.

SECTION 5307 – URBANIZED AREA FORMULA GRANTS

This program provides grants to Urbanized Areas (UZA) for public transportation, capital, planning, preventive maintenance, as well as operating expenses. These funds constitute a core investment in the enhancement and revitalization of public transportation sys-

tems in the nation's urbanized areas, which depend on public transportation to improve mobility and reduce congestion. This funding is obligated to Wyoming's urbanized areas (Casper and Cheyenne) for public transportation services. All projects must benefit residents in urbanized areas (over 50,000 population) of Wyoming. Section 5307 provides federal funds up to 80% for capital, 85% for ADA-compliant vehicles and 50% of operating needs of transit providers.

The Casper Metropolitan Transportation Improvement Program (MTIP) and the City of Cheyenne MTIP for the fiscal years 2026-2029, and as amended, are included in the STIP by reference and are available at their websites at the following links:

Casper MTIP: https://www.casperwy.gov/residents/roads_and_parking/metropolitan_planning_organization

Cheyenne MTIP: <https://www.plancheyenne.org/transportation/transportation-improvement-program/>

SECTION 5310 – ENHANCED MOBILITY OF SENIORS AND INDIVIDUALS WITH DISABILITIES

This program is intended to enhance mobility for seniors and persons with disabilities by providing funds for programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services. This program provides formula funding to increase the mobility of seniors and persons with disabilities. The former New Freedom program (Section 5317) is folded into this program. The New Freedom program provided grants for services for individuals with disabilities that went above and beyond the requirements of the Americans with Disabilities Act (ADA). Activities eligible under New Freedom are now eligible under the Enhanced Mobility of Seniors and Individuals with Disabilities program. Using these funds for operating expenses requires a 50% local match, using these funds for capital expenses (including acquisition of public transportation services) requires a 20% local match, and a 15% match is required for ADA-compliant vehicles.

SECTION 5311 – FORMULA GRANTS FOR RURAL AREAS

This program provides capital, administrative and operating assistance to State agencies, local governments, Indian tribes and non-profit organizations providing public transportation services in rural areas, defined as areas with fewer than 50,000 residents. The program remains largely unchanged under the IIJA. Activities eligible under the former Job Access and Reverse Commute (JARC) program (Section 5316), which provided services to low-income individuals to access jobs, are now eligible under the Rural Area

Formula program. Projects must benefit residents in non-urbanized areas of Wyoming. Section 5311 provides federal funds up to 80% for capital, administrative and preventive maintenance costs, 85% for ADA-compliant vehicles and 56.56% for the operating needs of transit providers.

SECTION 5311(f) – INTERCITY BUS PROGRAM

This section requires each state to spend 15% of its annual Section 5311 apportionment to develop and support a program of projects for intercity bus transportation. The goal of the program is to connect isolated rural areas throughout the country to larger communities. Wyoming has identified six potential routes that support this goal and serve the people of Wyoming. In Wyoming, intercity bus service is a vital link between otherwise isolated rural communities to other areas of the state and the rest of the nation.

SECTION 5339 – BUS AND BUS FACILITIES

This capital program provides funding to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities. Eligible capital projects include the acquisition of buses for fleet and service expansion, bus maintenance, storage and administrative facilities, transfer facilities, bus malls, transportation centers, intermodal terminals, park-and-ride stations, acquisition of replacement vehicles, bus rebuilds, passenger amenities such as passenger shelters and bus stop signs, accessory and miscellaneous equipment such as mobile radio units, supervisory vehicles, fare boxes, computers, and shop and garage equipment. This is an apportionment program divided between the Rural and Urban areas of Wyoming. The urban areas of Wyoming are Casper and Cheyenne. This program requires a 20% local match or a 15% local match for ADA-compliant vehicles.

WYDOT has developed our Transit Asset Management (TAM) Plan in accordance with the [2016 TAM Final Rule 49 CFR Parts 625 and 630](#). Section 625.27 requires States to develop a group TAM Plan for subrecipients under the Rural Area Formula Program, authorized under 49 U.S.C 5311. Wyoming subrecipients all fall under a Tier II criteria and WYDOT has developed a Group Tier II TAM Plan. The elements of a Group Tier II plan consist of an asset inventory, condition assessment, list of decision support tools and investment prioritization. WYDOT implemented a hybrid method of Useful Life Benchmarks (ULB) combining the FTA default ULB's for vehicle categories with the age and miles previously used in FTA C 5010.1E. WYDOT implemented the vehicle categories to facilitate the condition assessment of the Capital assets (FTA funded vehicle and facility) and to assist with the decision support tool mechanism and investment prioritization. WYDOT's TAM Plan includes the following categories of vehicle purchases.

BUS CATEGORIES PER THE WYDOT TRANSIT ASSET MANAGEMENT PLAN (TAM PLAN) – ADOPTED AUGUST 2023

- Heavy-duty large bus – buses with a minimum service life of 14 years or 500,000 miles, approx. 35-40 feet in length
- Heavy-duty small bus – buses with a minimum service life of 12 years or 350,000 miles, approximately 30-35 feet in length
- Medium-sized cutaway – buses with a minimum service life of 7 or 10 years or 200,000 miles, approximately 25-30 feet in length
- Light-duty mid-sized cutaway – buses with a minimum service life of 7 or 10 years or 150,000 miles, approximately 20-25 feet in length
- Light-duty small cutaway – buses with a minimum service life of 7 or 10 years or 100,000 to 150,000 miles, approximately 16-22 feet in length
- Van – van with a minimum service life of 8 years or 100,000 miles
- Minivan/Car/SUV – vehicles with a minimum service life of 8 years or 100,000 miles

The following is a list of all eligible applicants for FTA programs 5310, 5311, 5339 and 5305(e). Other non-profit groups that provide public transportation service and would meet the requirements of the individual program will be evaluated on a case-by-case situation. Funding has been awarded for FY2026 for numerous projects and will be solicited on an annual basis for subsequent years.

WYOMING PROGRAM OF PROJECTS
VOUCHER & MOBILITY MANAGEMENT PROGRAM – SECTION 5310
FY 2026 – FY 2029

The Voucher and Mobility Management Programs are currently a statewide project designed to assist with the coordination of transportation services on the local level. The project led to the development and continued maintenance of the website www.wyomingtransit.org that includes a comprehensive listing of available public and private transportation providers throughout Wyoming. The Mobility Management program is assisting WYDOT and local entities to find solutions to mobility issues that impact the people of Wyoming. Wyoming Independent Living and Wyoming Services for Independent Living administer the Voucher and Mobility Management Programs through annual project agreements with WYDOT.

****As per Wyoming S.S. 24-15-101, 1999 Session.

FTA PUBLIC TRANSIT – SECTION 5339 FY 2026 – FY 2029

The formula Section 5339 program provides funds for bus and bus facilities in urban and rural areas throughout the state. Projects have been solicited for FY2026 utilizing funds from the balance of 2023, 2024 and 2025 apportionments and an estimated amount for FY2026. Projects will be solicited for future fiscal years depending on the publishing of the guidance for the program and the apportionment available. WYDOT has state vehicle contracts in place and will be purchasing multiple vehicles from these contracts for FY2026.

**FTA RURAL PUBLIC TRANSIT – SECTION 5311(f) Intercity Bus
FY 2026 – FY 2029**

The Intercity Bus program in Wyoming is primarily used to connect rural areas with larger regional intercity bus carriers. Consistent with this goal, the current high priority projects/routes in Wyoming are:

- I-90 - South Dakota state line to Montana state line.
- Wyoming 191, 89, 30, 189 & I-80 – Jackson to Utah state line.
- I-25 – Colorado state line to Casper and Casper to Buffalo.
- Wyoming 20/26, 20/16/14, US alt 14 and US 310/WYO789 – Big Horn Basin.
- I-80 Corridor – Evanston to Cheyenne.
- US 26 – Jackson to the Wyoming/Idaho Border, north and southbound daily service.

Estimated 5311(f) Allocation

TRANSIT ASSET MANAGEMENT

The objective of WYDOT's Transit Program is to provide high quality, affordable public transportation services that are safe, reliable, useful, accessible, and efficient. Transit projects included in the STIP are developed in coordination with other designated agencies, organizations, and local transit agencies throughout the state to provide alternatives for transportation to Wyoming's residents. WYDOT administers Federal Transit Administration (FTA) grant funding for subrecipients under both the Section 5307 and Section 5311 programs, and sponsors the statewide transit asset management plan on behalf of a group of Tier II Transit Providers within the State of Wyoming to support subrecipients' compliance with the FTA Final TAM Rule.

Federal regulations (49 CFR Part 625) require all recipients of FTA Chapter 53 funding to develop asset management plans for transit assets owned, operated, or managed by the organization, including vehicles, facilities, equipment, and other infrastructure. WYDOT is considered a Sponsor, or designated recipient responsible for developing a group TAM plan for Tier II providers that own, operate, or manage transit capital assets, except those direct recipients under the Section 5307 program (Cheyenne and Casper). All FTA-funded public transportation agencies in Wyoming are Tier II providers, which is defined by the TAM Final Rule as an agency that, "owns, operates, or manages either (1) 100 or fewer vehicles in revenue service during peak regular service across all non-rail fixed route modes or in any one non-fixed route mode (2) a subrecipient under the 5311 Rural Area Formula Program (3) any American Indian tribe (625.5)." All Tier II public transportation agencies operating in the State of Wyoming that receive Chapter 53 FTA funds (either as a direct recipient or a sub recipient) to purchase an asset used to provide public transportation services have chosen to participate in WYDOT's group Transit Asset Management Plan.

WYDOT's Transit Program is responsible for developing the WYDOT sponsored group Transit Asset Management Plan, which outlines the process for administering all FTA programs, and establishes strategies for improving the state of good repair (SGR) of the public transportation system within the state. Transit asset management is a business model that assesses current asset conditions to optimize funding priorities within local and rural transit agencies to keep Wyoming's transit systems in a SGR. It informs investment decisions based on the condition of transit assets over their lifespan, utilizing policies that account for prevention, preservation, maintenance, inspection, rehabilitation, disposal, and replacement of capital assets.

In developing this plan, WYDOT helped Tier II agencies identify a set of guiding principles to direct their asset management efforts, as follows:

- Maintain, update and enhance the inventory of assets.
- Document, monitor and improve the condition of the system and annual performance measures and targets.
- Make investments following a structured decision-support framework to ensure available funds are spent effectively.
- Create investment priorities considering holistic needs of the traveling public, considering safety, accessibility and available funding.

SGR measures were used to establish performance benchmarks based on condition and useful service life of transit assets, which may directly impact the ability of assets to perform their intended function of providing alternative transportation services to residents. WYDOT defines SGR with respect to its capital assets as those assets that are capable of operating at full performance level according to functional and design standards, do not pose any unacceptable safety risks or deny access, and which have had their lifecycle investment needs maintained throughout the life of the asset. SGR performance criteria include an asset's physical condition because it directly reflects its ability to perform its intended function.

Transit asset conditions are reported as a percentage of vehicles in a SGR, using the following measures for rolling stock, equipment, and facilities:

- **ROLLING STOCK:** The percentage of revenue vehicles (fixed-route and paratransit) within a particular asset class that have either met or exceeded their miles, age, and condition.
- **EQUIPMENT:** The percentage of non-revenue, support-service and maintenance vehicle equipment that have either met or exceeded their SGR of miles, age, and condition.
- **FACILITIES (CONDITION):** The percentage of facilities within an asset class rated below condition 3 on the FTA Transit Economic Requirements Model (TERM) Scale.

WYDOT requires each vehicular asset and facility that meets FTA criteria to have a physical condition assessment conducted on a biannual basis, where applicable. The condition assessment uses a scale to rate the current physical appearance, maintenance requirements, safety, and accessibility of an asset. Useful Life Benchmark (ULB) is a capital asset's expected lifespan in Wyoming's

operating environment. ULB considers service frequency, weather, and geography, and takes into account the local operating environment of its assets within the service area, historical maintenance records, manufacturer guidelines, and the FTA's default asset ULB. If an asset exceeds its ULB, then that could indicate it may not be in a state of good repair, but actual replacements of assets are conducted after considering their age, condition (based on current physical condition assessment) and mileage. The table below contains WYDOT's assumptions for Useful Life Benchmark for transit vehicles, which are generally consistent with FTA's default ULB "[cheat sheet](#)"¹.

Useful Life Benchmark for Transit Vehicles

Category	Length	Seats	Useful Life Benchmark (Years)	Typical Expected Miles
Heavy-Duty Large Bus	35 - 40+ ft	27 to 40+	14	500,000
Heavy-Duty Small Bus	30 - 35 ft	24 to 35	12	350,000
Medium-Sized Cutaway	25 - 30 ft	16 to 30	7 or 10 years	200,000
Light-Duty Mid-Sized Cutaway	20 - 25 ft	8 to 16	7 or 10 years	150,000
Light-Duty Small Cutaway	16 - 22 ft	3 to 14	7 or 10 years	100,000 to 150,000
Van	-	3 to 15	8	100,000
Automobile	-	3 to 7	8	100,000

Source: WYDOT Transit Asset Management Plan

WYDOT used a combination of BlackCat® Transit Data Management System, including its Transportation Asset Management (TAM) and an Excel-based model to calculate state of good repair needs and support investment decision-making. The prioritization of asset replacements for the capital plan is based on age and expected useful life. In addition to the capital needs listed for planning purposes, WYDOT and the participating agencies are committed to using transit funding to ensure a safe, reliable, accessible, and efficient public transportation system. Transit asset needs are determined in accordance with the TAM guiding principles, and are based on a prioritized schedule of maintenance activities that achieve optimal service life (e.g., age, mileage), followed by timely replacement of assets (focusing on revenue vehicles). This will help improve the physical condition of assets, improve the performance of transit systems, and minimize any service disruptions.

¹ <https://www.transit.dot.gov/sites/fta.dot.gov/files/2021-11/TAM-ULB-CheatSheet.pdf>

All FTA performance targets have been met based on actual reported transit asset conditions. For the Rolling Stock performance target, the department has been using funds to replace older buses to keep its bus fleets current and operational. The main challenge WYDOT faces has been obtaining local matching funds for bus replacements in some of the more rural areas of the state, due to limited or declining transit revenues in areas with small populations.

WYDOT's transit SGR targets and measures are summarized in the following table.

FTA Performance Target Assessment				
Asset Category	FTA Established Performance Measure	2024 WYDOT Target	2024 WYDOT Actual	Target Met?
Rolling Stock (vehicles)	% of Revenue Vehicles exceeding ULB	40%	47%	No
Equipment	% of Non-Revenue Service Vehicles exceeding ULB	65%	63%	Yes
Facilities	% of Facilities under 3.0 on the TERM scale	10%	0%	Yes

WYDOT and MPOs work together to meet transit-related performance measures as required by the FAST Act under FTA regarding safety and transit asset management. MPO Transit programs coordinate with WYDOT's Transit Office on implementing their transit asset management programs. To continue meeting transit performance targets, MPOs have been systematically replacing a number of older, high mileage buses each year as funding allows. New surveillance cameras and recording devices have been installed on buses to improve rider safety and security, and lighting is being added to bus shelters to help keep riders safe. MPO transit performance measures are included under the Metropolitan Planning Organization section.

TRANSIT PROJECTS CHARACTER OF WORK

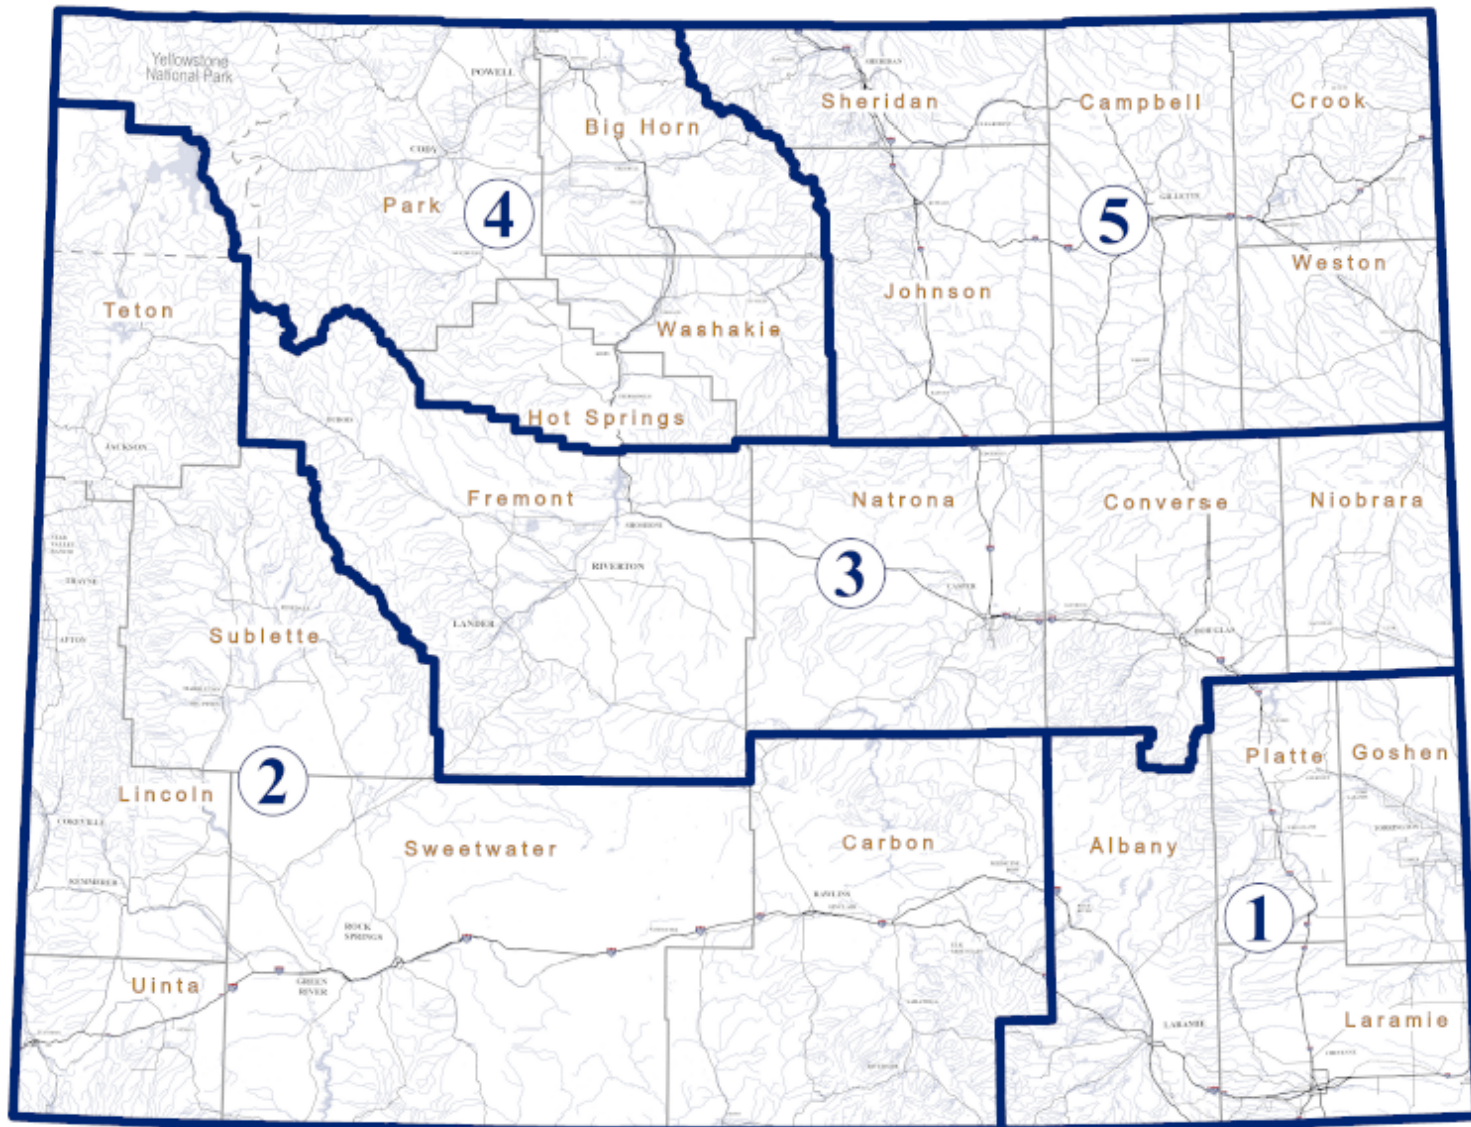

Character of Work	Description
ADMINISTRATION	Funding for general administrative expenses. Example: salaries for the project director, secretary, or bookkeeper; marketing; insurance premiums; office supplies; administering drug and alcohol testing.
BUS GARAGE PROJECT	Construction of a bus garage by a subrecipient to be used for storage and maintenance of transit vehicles.
BUS GARAGE CONSTRUCTION	Construction of bus garage for storage of transit vehicles.
BUS GARAGE REHAB	Rehab of bus garage by a subrecipient to be used for storage and maintenance of transit vehicles.
CAPITAL/BUS FACILITIES	Eligible capital expenses include the acquisition, construction, and improvement of public transit facilities and equipment for a safe, efficient and coordinated public transportation system to include but not limited to: purchase of buses, vans, radios, security and communications equipment, passenger shelters, park and ride lots, and wheelchair lifts
CAPITAL/BUS SHELTERS	Purchase and installation of bus shelters for passengers to use while waiting for a bus.
CAPITAL/CARPORTS	Purchase and installation of carports to park transit vehicles under to protect vehicles from weather, etc.
CAPITAL/DRIVEWAY REPLACEMENT	Upkeep and replacement of driveways to protect the transit vehicles.
CAPITAL/TIE DOWNS	Purchase of tie downs for transit vehicles.

Character of Work	Description
CAPITAL/OPERATING/ADMIN/MAINT	Funding award to administer the subrecipients transit program to include operating, administration, maintenance and capital.
CAPITAL/SECURITY CAMERAS	Purchase and installation of security cameras.
MOBILITY MANAGEMENT-URBAN	Funding to build coordination among existing public transportation providers and other transportation service providers with the result of expanding the availability of service in urban areas.
MOBILITY MANAGEMENT VOUCHER	Funding for public transportation projects that exceed the requirements of ADA; that build coordination among existing public transportation providers and other transportation service providers with the result of expanding the availability of service.
OPERATING	Expenses directly related to system operations to include fuel, oil, drivers' salaries, dispatcher salaries and licenses.
OPERATING/ADMINISTRATION/MAINTENANCE	A combination of Operating, Administration and Maintenance funding used for the support of public transportation projects awarded.
OPERATING-VOUCHER-STATEWIDE	Funding for public transportation projects that exceed the requirements of ADA; that improve access to fixed-route service and alternatives to public transportation that assist seniors and individuals with disabilities.
OPERATING-VOUCHER-URBAN	Funding for public transportation projects that exceed the requirements of ADA; that improve access to fixed-route service and alternatives to public transportation that assist seniors and individuals with disabilities in urban areas.
PERFORMANCE BASED FUNDING	Performance based funding for transit providers awarded by a point system to the top ten transit providers for an incentive to follow all requirements of the transit program in a timely manner.
PLANNING	Expenses to support efforts to develop transportation plans and programs; plan, engineer, design and evaluate a public transportation project and conduct technical studies relating to public transportation.

Character of Work	Description
PURCHASE FOUR HEAVY-DUTY BUSES	Funding for buses with minimum service life of 14 years or 500,000 miles, approximately 35-40+ feet in length as well as articulated buses.
PURCHASE LARGE BUS	Funding for buses with minimum service life of 14 years or 500,000 miles, approximately 35-40+ feet in length as well as articulated buses.
PURCHASE MEDIUM-DUTY BUS	Funding for bus with minimum service life of 10 years or 200,000 miles, approximately 25-35 feet in length as well as articulated buses.
PURCHASE MINI-VAN	Funding for mini-van with minimum service life of 8 years or 100,000 miles.
PURCHASE ONE HEAVY-DUTY BUS	Funding for buses with minimum service life of 14 years or 500,000 miles, approximately 35-40+ feet in length as well as articulated buses.
PURCHASE ONE LIGHT-DUTY BUS	Funding for bus with minimum service life of 10 years or 150,000 miles, approximately 20-35 feet in length.
PURCHASE ONE LIGHT-DUTY VAN	Funding for vehicles with a minimum service life of 8 years or 100,000 miles. Cutaways and modified vans, approximately 16-28 feet in length.
PURCHASE TWO LIGHT-DUTY BUSES	Funding for buses with minimum service life of 10 years or 150,000 miles, approximately 20-35 feet in length.
PURCHASE TWO MEDIUM-DUTY BUSES	Funding for buses with minimum service life of 10 years or 200,000 miles, approximately 25-35 feet in length.
PURCHASE TWO MINI VANS	Funding for two mini-vans with minimum service life of 8 years or 100,000 miles.

Character of Work	Description
PURCHASE SEVEN HEAVY-DUTY BUSES	Funding for seven buses with minimum service life of 14 years or 500,000 miles, approximately 35-40+ feet in length as well as articulated buses.
RTAP	Funding to assist in the design and implementation of training and technical assistance projects and other support services tailored to meet the specific needs of transit operators in rural areas.
SHOSHONI BUS STATION	Construction or maintenance of a bus station in Shoshoni.
STATE ADMINISTRATION	Funding for WYDOT to administer the Federal programs - to pay salaries, overhead expenses, supplies and office equipment to administer the programs.
STATEWIDE TRAINING	Funding to assist in the design and implementation of training and technical assistance projects and other support services tailored to meet the specific needs of transit operators in rural areas.
TRANSIT FACILITY REHAB	Rehab of transit facility used for the storage and maintenance of transit vehicles.
VEHICLE PURCHASE-STATEWIDE	Purchase of vehicle for statewide subrecipient.
VEHICLE PURCHASE-URBAN	Purchase of vehicle for urban recipient - Cheyenne or Casper.

AERONAUTICS INTRODUCTION

In accordance with Wyoming Statutes §§ 10-3-401 and 10-3-402, the State of Wyoming invests in a system of approximately forty public-use, locally- owned airports located throughout the state. The Aeronautics Division maintains a statewide system of airport capital improvement projects, known as the Wyoming Aviation Capital Improvement Plan (WACIP), which is included as part of the Wyoming Department of Transportation’s State Transportation Improvement Program (STIP). The WACIP is a five year plan that is a collaborative process involving citizens, airport users, airport sponsors, the Division and the Federal Aviation Administration (FAA). Creation of the WACIP is a year-long process which begins at the local level and results in a group of projects being submitted by each sponsor to the Division during the annual planning update. This is followed by an extensive review and prioritization by Division staff, as well as coordination with the FAA. The proposed WACIP is then sent back to the sponsor for comment before final consideration by the Wyoming Aeronautics Commission (WAC). It is important to note that the WACIP is a dynamic document with modifications submitted to the WAC for consideration each month. A two-year “snapshot” of the WACIP is taken in approximately June of each year and included in the STIP.

In administering the grants program, WS §10-3-401(d) requires that the WAC “establish, amend and have available” a five year capital improvement plan for airports in the state. The inclusion of the WACIP in the STIP is intended to satisfy this requirement. As mentioned above, the WACIP is regulated by a seven-member Aeronautics Commission made up of representatives from five districts and two members that serve at-large who are appointed by the governor and confirmed by the senate. The Director of WYDOT is an ex-officio member of the commission.

Wyoming is a channeling act state as referenced in WS §10-3-201(b). This means that in most cases when federal funds are used to finance airport development in Wyoming, the airport sponsor submits requests for reimbursement to the Division with the state making payment directly to the airport. The FAA is then billed by the state for the federal portion of the grant payment.

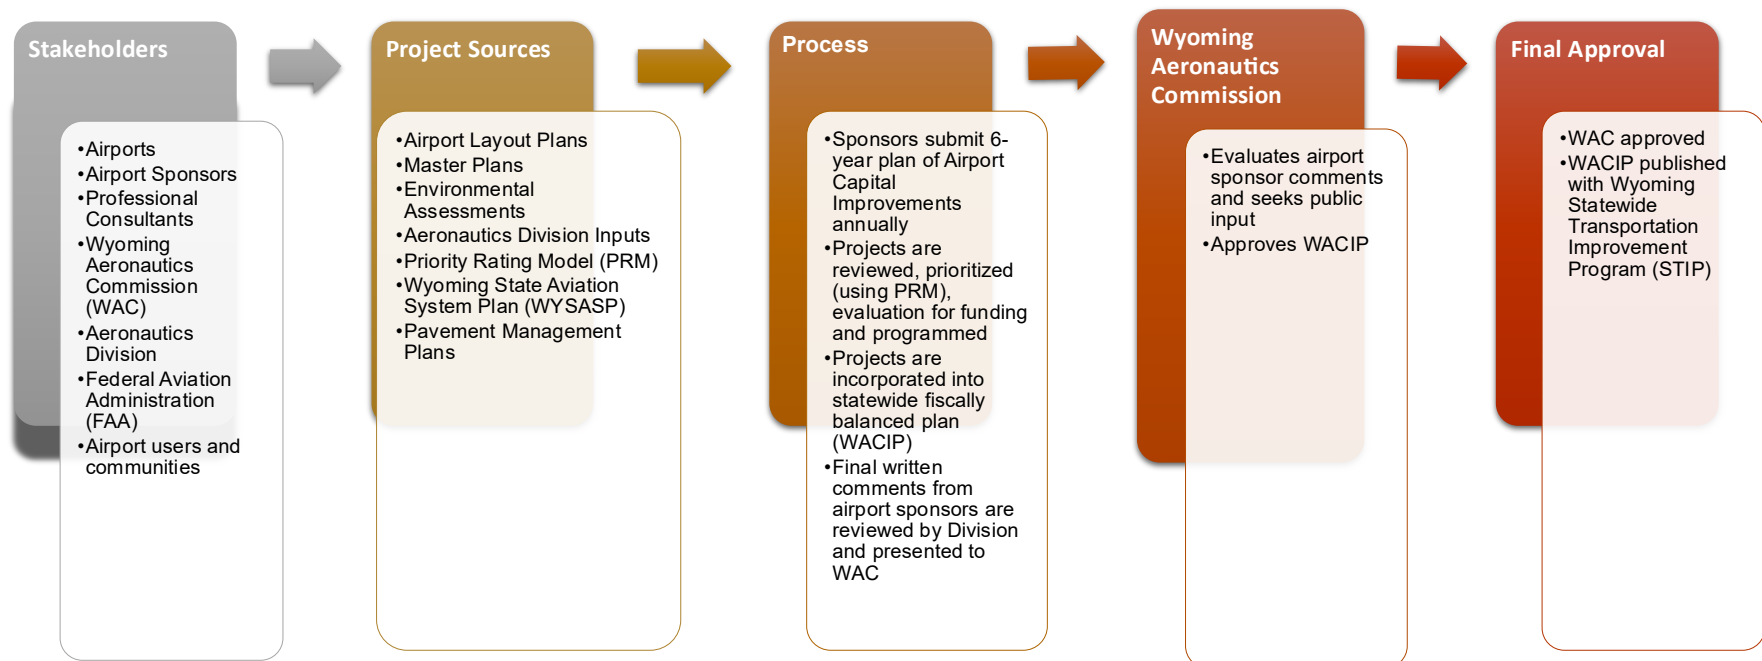

Federal funds are provided to the airports in varying percentages based on the airport category. Normally primary commercial service airports receive 93.75% and general aviation airports receive 90%. These funds are awarded directly to the airport by the FAA. In many states, the local airport pays the remaining balance. In Wyoming, however, the state invests in airport construction

and improvement as well as air service enhancement. State and local shares of the remaining balance are based on the type of project and are defined in commission Policy and Procedures.

Development of a statewide capital improvement plan such as the WACIP is a complex process involving many different entities representing different constituencies. WYDOT is committed to achieving a safe, integrated aviation system that accommodates the wide variety of uses that occur at airports within the state. The WACIP is a collaboration of these different interests and commitment by each stakeholder to develop the state aviation system in the public interest.

For additional information on the Aeronautics Program contact Administrator Shawn Burke, at (307) 777-3953, 200 East 8th Avenue, Cheyenne, Wyoming 82001.

ELEMENTS COMPRISING THE WYOMING AVIATION CAPITAL IMPROVEMENT PLAN (WACIP)

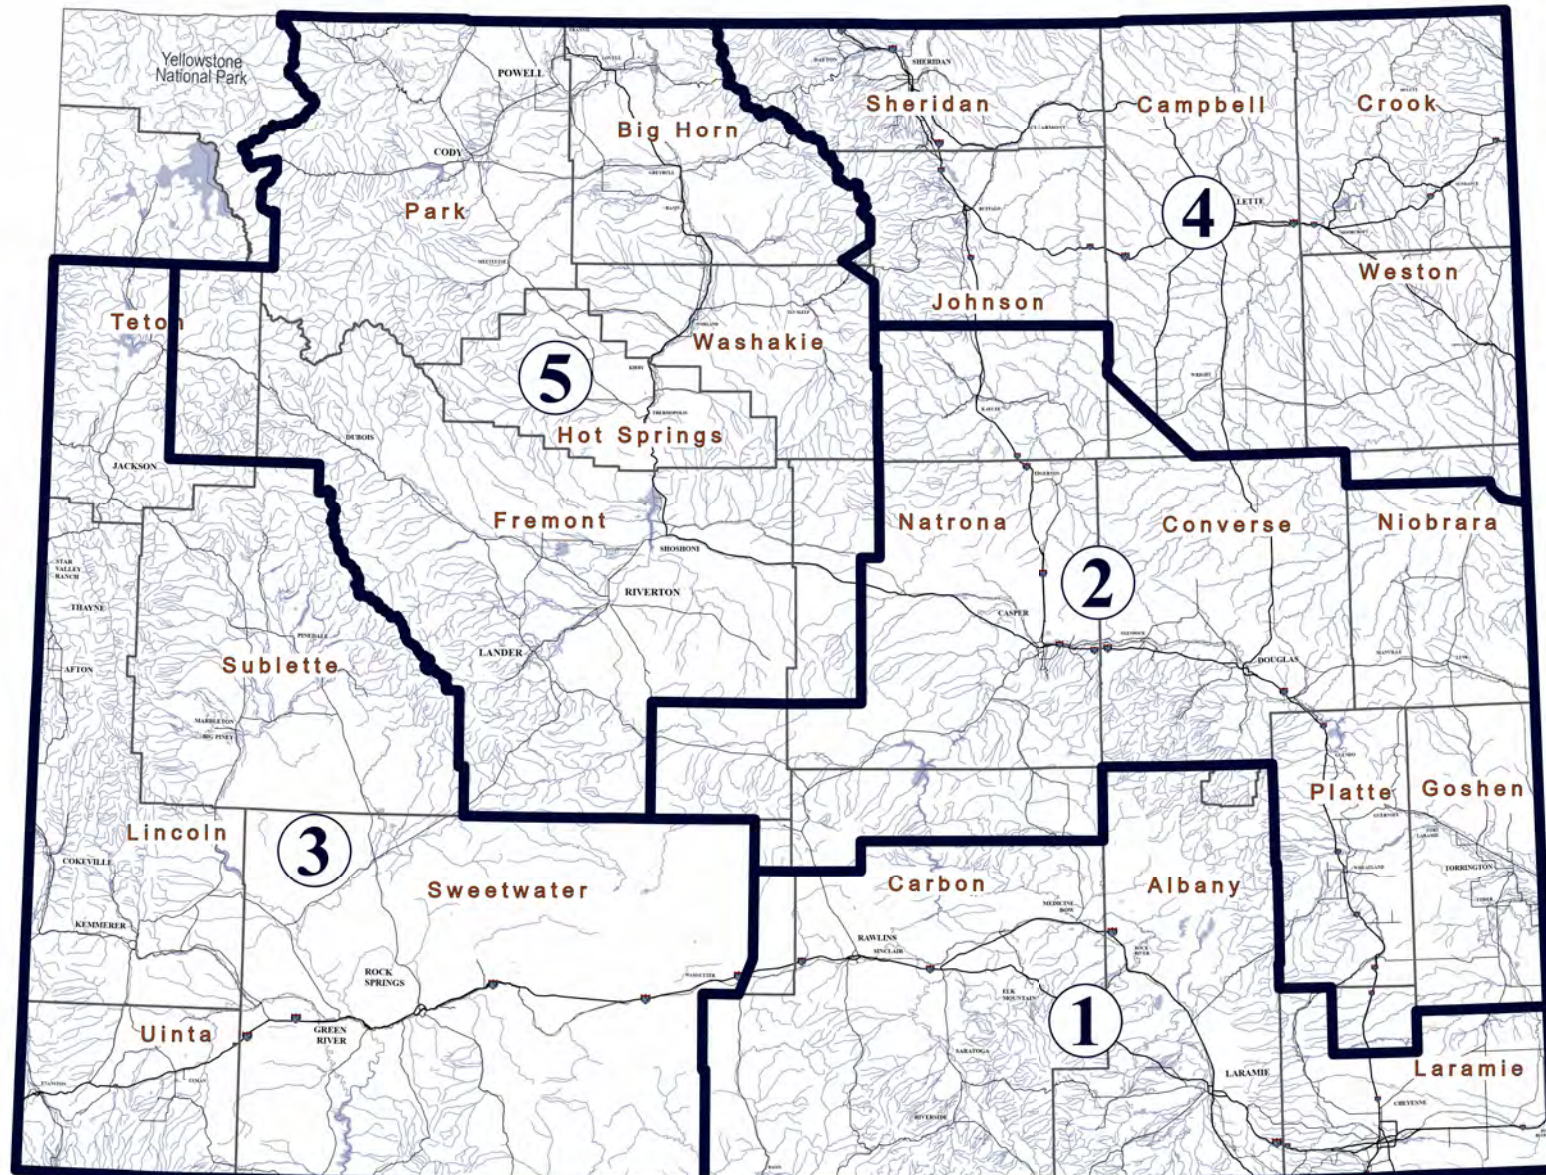

AERONAUTICS CHARACTER OF WORK

Character of Work	Description	Examples
ACQUIRE LAND/EASEMENT	Acquisition of land for airport expansion, improved safety or airport approach protection	Typically includes all associated costs such as appraisals, review appraisals, relocation, and legal expenses
AIRCRAFT RESCUE FIREFIGHTING (ARFF) TRAINING	Assist with the costs to train Wyoming airport firefighters at the in-state training facility located at the Casper-Natrona County International Airport	Water, fuel, firefighting retardant
AIRPORT EQUIPMENT	Acquisition, maintenance, or removal of fixed and mobile airport equipment	Automated Weather Observation Systems (AWOS/ASOS), navigational, snow removal, operations, Aircraft Rescue Firefighting (ARFF), fuel system and friction measurement equipment
AIRPORT SPECIFIC-USE APRON	Areas of an airport which have additional facilities or equipment to accommodate certain types of activity	Deicing containment facility, fuel facility, or agricultural spraying pad
AIRSPACE OBSTRUCTIONS	Marking, lighting, or removal of airspace penetrations in the vicinity of an aviation facility	Communications tower, fence, trees
AVIATION ENCOURAGEMENT	Projects to encourage an interest in aviation	Air show, fly-in, open house, ground breaking, pilot/mechanic education

Character of Work	Description	Examples
BUILDINGS	Acquire, construct, expand, rehabilitate, remove, relocate airport buildings	Commercial terminal, general aviation terminal, snow removal equipment, operations equipment building, aircraft hangar, air traffic control tower
FENCING	Construct, relocate or remove airport fencing	Wildlife or security fencing
IMPROVE LIGHTING OR SIGNAGE	Install, rehabilitate, and relocate airport lighting and signage	Approach lighting system, pavement edge lighting, security lighting, airport beacon, Runway End Identifier Lights (REIL), electrical vault, lighting system control, illuminated signs
MARKETING & PROMOTIONS	Projects to promote commercial air service	Marketing campaign, market research
NAVAID MAINTENANCE	Contracted annual maintenance for various on- airport non-federal navigational aid equipment	Automated Weather Observation Systems (AWOS), instrument approach aids (ILS or NDB), and visual approach indicators
OPERATIONS	Federal Cares Act	Airport Operations
PAVEMENT EXPANSION	Construct, expand, extend, widen, or strengthen airport pavement	Access road, auto parking lot, aircraft parking apron, runway, taxiway, taxilane, helipad, helicopter parking apron, runway or taxiway shoulders, jet blast pad

Character of Work	Description	Examples
PAVEMENT MAINTENANCE	Preventative maintenance to preserve existing pavement	Crack sealing, crack surfacing, spall repair, seal coat, and marking
PAVEMENT RECONSTRUCTION	Remove and replace pavement, subgrade soils	Remove and replace runway, taxiway or other airport pavement
PAVEMENT REHABILITATION	Correct functional and structural pavement deficiencies	Mill and/or leveling followed by overlay (greater than 2"), isolated reconstruction
PLANNING STUDY	General airport planning and some complex topics may require additional study such as replacing a terminal or constructing an air traffic control tower	Airport Master Plan, Airport Layout Plan, instrument approach analysis, feasibility study
STATE AVIATION SYSTEM PLAN	Studies of various topics to determine the size, location and extent of airport development needed across the State	Design Standards Inventory, Wyoming State Aviation System Plan, Statewide Economic Impact Study, Instrument Approach Analysis, Rates and Charges Guide
AIRPORT PAVEMENT MGMT PLAN	Comprehensive pavement asset management system	Thorough analysis of the current pavement condition and recommendation for future work
GRP PAVEMENT MAINT PROGRAM	Statewide multi-airport pavement maintenance project	Crack seal, joint seal and spall repair

ILLUSTRATIVE PROJECTS

The following list includes projects that could be considered if Wyoming were to receive additional funding thereby allowing the State to proceed with these projects if deemed necessary. The focus of the projects listed below is on freight and economic issues the State faces and is illustrative only.

- There is a need to keep up with system preservation and improvement needs of Wyoming's transportation system. Current funding levels do not allow the state to address all of the needs. Several proposed improvement projects that address roadways, airports, buildings and emergency communications can be moved into the improvement program if funding were made available.
- Traffic studies have indicated that additional truck climbing lanes are warranted in areas of the I-80 corridor due to increasing freight movements and winter mobility issues. Climbing lanes will reduce congestion and improve the overall level of service and safety for I-80. Combined with this, additional truck parking along I-80 is needed. Several areas between Evanston and Rawlins on I-80 would benefit from additional truck parking due to this being a primary freight corridor. The area between Rawlins and Laramie experiences severe winter weather conditions and providing additional truck parking in this area would increase safety, especially during winter months.
- Provide passing lanes to improve safety, mobility and reduce congestion on various 2-lane corridors. Projects will be targeted at those corridors that are experiencing high truck/traffic volumes that have a large mix of commercial and industrial vehicles.
- WYDOT and the Wyoming Game and Fish have cooperatively developed a priority list of areas needing wildlife crossing mitigation to reduce animal vehicle crashes and foster game connectivity. A top ten list of areas has been developed to address the primary transportation crossing locations. The Wyoming legislature has passed legislation allowing for special license plates for wildlife and the fees can be used to fund these crossing areas, along with WG&F funding and other funds from NGO's. Provided sufficient funding becomes available wildlife crossings can be moved into the STIP.

Prefix	Description
STP-GM	SURFACE TRANSPORTATION PROGRAM - CONSTRUCTION MAINTENANCE PROGRAM - GENERAL MAINTENANCE
STP-PM	SURFACE TRANSPORTATION PROGRAM - CONSTRUCTION MAINTENANCE PROGRAM - PAVEMENT MAINTENANCE
STP-PO	SURFACE TRANSPORTATION PROGRAM - CONSTRUCTION MAINTENANCE PROGRAM - PAVEMENT OVERLAYS/RESURFACING
STP-RA	SURFACE TRANSPORTATION PROGRAM - REST AREA PROJECT
STP-RF	SURFACE TRANSPORTATION PROGRAM - CONSTRUCTION MAINTENANCE PROGRAM - RIGHT-OF-WAY FENCE
STP-SF	SURFACE TRANSPORTATION PROGRAM - CONSTRUCTION MAINTENANCE PROGRAM - SNOW FENCE
STP-SR	SURFACE TRANSPORTATION PROGRAM - CONSTRUCTION MAINTENANCE PROGRAM - STRUCTURE REPAIR
STPU	SURFACE TRANSPORTATION PROGRAM - URBAN
STPU-CA	SURFACE TRANSPORTATION PROGRAM - URBAN- CASPER
STPU-CH	SURFACE TRANSPORTATION PROGRAM - URBAN- CHEYENNE
STPU-CO	SURFACE TRANSPORTATION PROGRAM - URBAN- CODY
STPU-DO	SURFACE TRANSPORTATION PROGRAM - URBAN- DOUGLAS
STPU-EV	SURFACE TRANSPORTATION PROGRAM - URBAN- EVANSTON
STPU-GI	SURFACE TRANSPORTATION PROGRAM - URBAN- GILLETTE
STPU-GR	SURFACE TRANSPORTATION PROGRAM - URBAN- GREEN RIVER
STPU-LA	SURFACE TRANSPORTATION PROGRAM - URBAN- LARAMIE
STPU-LN	SURFACE TRANSPORTATION PROGRAM - URBAN- LANDER
STPU-PO	SURFACE TRANSPORTATION PROGRAM - URBAN- POWELL
STPU-RI	SURFACE TRANSPORTATION PROGRAM - URBAN- RIVERTON
STPU-RO	SURFACE TRANSPORTATION PROGRAM - URBAN- ROCK SPRINGS
STPU-RW	SURFACE TRANSPORTATION PROGRAM - URBAN- RAWLINS
STPU-SH	SURFACE TRANSPORTATION PROGRAM - URBAN- SHERIDAN
STPU-TO	SURFACE TRANSPORTATION PROGRAM - URBAN- TORRINGTON
STPU-WO	SURFACE TRANSPORTATION PROGRAM - URBAN- WORLAND
TIDP	TECHNOLOGY AND INNOVATION DEPLOYMENT PROGRAM - DEMO PROJECT

Prefix	Description
TT	TECHNOLOGY TRANSFER T2

PREFIX DESIGNATION **STATE PROJECTS**

Prefix	Description
ARSCT	AUTHORITY FOR RENDERING SERVICE CONTRACT
CIP	CAPITAL IMPROVEMENT PROJECT
CMP-GM	CONTRACT MAINTENANCE PROGRAM - GENERAL MAINTENANCE
CMP-PM	CONTRACT MAINTENANCE PROGRAM - PAVEMENT MAINTENANCE
CMP-PO	CONTRACT MAINTENANCE PROGRAM - PAVEMENT OVERLAY
CMP-RF	CONTRACT MAINTENANCE PROGRAM - RIGHT-OF-WAY FENCE
CMP-SF	CONTRACT MAINTENANCE PROGRAM - SNOW FENCE
CMP-SR	CONTRACT MAINTENANCE PROGRAM - STRUCTURE REPAIR
DR	DAMAGE REPAIR
GCP	GRADE CROSSING PROTECTION
IRP	INDUSTRIAL ROAD PROJECT
ND	NATURAL DISASTER PROJECT
PEG	PROPERTY & EQUIPMENT - STOCKPILES
ROW	RIGHT OF WAY
SCP	STATE CONSTRUCTION PROJECT
SCP-TC	STATE CONSTRUCTION PROJECT - TEN CENT
SCP-TC-BR	STATE CONSTRUCTION PROJECT - TEN CENT - BRIDGE REHABILITATION OR REPLACEMENT
SPR	STATE PARK ROAD
SSP-TO	STATE SAFETY PROJECT - TRAFFIC OPERATIONS
WL	WILDLIFE PROJECT

ASSIGNMENT OF PROJECT NUMBERS

The following guidelines are used to assign seven-digit project IDs.

Interstate projects begin with an "I" followed by the Linear Referencing System (LRS) number: 25, 80, 90, or 180. For I-25, I-80 and I-90, the "section" reference is next, which corresponds closely with the first county it crosses, the second county it crosses, etc. The section number ascends from west to east and south to north. The last three numbers represent the project sequence number.

Examples:	I806211	LRS number 80, section 6 (Laramie County), 211 th project
	I251099	LRS number 25, section 1 (Laramie County), 99 th project
	I180013	LRS number 180, no section needed, 13 th project

Principal Arterial National Highway System (NHS) projects begin with an "N" followed by the LRS number, section reference, and sequence number.

Examples:	N851045	LRS number 85, section 1 (Laramie County), 45 th project
	N232036	LRS number 23, section 2 (Albany County), 36 th project

Non-NHS projects with a 2-digit LRS begin with "P" followed by LRS number, section reference and sequence number.

Examples:	P182033	LRS number 18, section 2 (Carbon County), 33 rd project
	P221060	LRS number 22, section 1 (Carbon County), 60 th project

Non-NHS projects with 3-digits or more LRS are identified with the LRS number and sequence number.

Examples:	0103052	LRS number 103, 52 nd project
	1103165	LRS number 1103, 165 th project
	4200043	LRS number 4200, 43 rd project

Projects not on the federal-aid highway system (state system only) will begin with "W" followed by the LRS number and a sequence number. "U" is used if a project is located within urban limits.

Examples: W211073 LRS number 211, 73rd project
 U212013 LRS number 212, 13th project, urban limit

County road projects are identified with a "CN" followed by a 2-digit county number and 3-digit sequence number.

Examples: CN05040 Albany County, 40th project
 CN13120 Converse County, 120th project

Statewide or district-wide projects begin with "B," followed by a 2-digit fiscal year designation, the transportation district number, and a 3-digit sequence number. Statewide projects use "9" for the transportation district designation.

Examples: B201006 Construction year 2020, Transportation District 1, 6th project
 B215010 Construction year 2021, Transportation District 5, 10th project

Wildlife projects begin with "WL" followed by the transportation district designation, the construction fiscal year, and a one-digit sequence number.

Example: WL32301 Transportation District 3, Construction year 2023, 1st project

Stockpile contract projects begin with "PEG" followed by the construction fiscal year, transportation district designation, and a one-digit sequence number.

Example: PEG2111 Construction year 2021, Transportation District 1, 1st project

Damage repair projects related a natural disaster begin with "ND" followed by the year, transportation district number, and a sequence number. All other damage repair projects begin with a "DR", followed by the transportation district number, and a sequence number.

Example: ND20501 Construction year 2020, Transportation District 5, 1st project
 DR51739 Transportation District 5, 1,739th project

Authority to Render Services (ARS by contract) projects use the first four digits of the primary associated project number and end with A01, A02, etc. (more than one ARS may be combined with a project).

Example: N345A01, N345A02, N345A03, PEG3A01

Transportation Alternative Projects begin with “CD” followed by the year, transportation district number, and a sequence number.

Example: CD19201 Construction year 2019, Transportation District 2, 1st project

Congestion Mitigation projects begin with “CM” followed by the year, transportation district number, and a sequence number.

Example: CM19101 Construction year 2019, Transportation District 1, 1st project

Statewide projects not on highways, such as bridge inspections or archaeological evaluations use a 2-digit abbreviation, followed by the fiscal year and a sequence number.

Examples: IT20001 ITS Yearly Project, fiscal year 2020, 1st project
 MS21001 Bridge Inspections, fiscal year 2021, 1st project

Aeronautics projects begin with “A,” followed by the first two digits of the airport’s FAA identifier, then a 3-digit sequence number, and a letter denoting the phase of a project, which is used when more than one year of funding is required to complete the work.

Example: ALAR27F Laramie, 27th project, phase F (ABCDEF) 6th year

Transit projects begin with “FT” and the fiscal year, followed by a sequence number.

Example: FT20002 Fiscal year 2020, 2nd project

Communications projects begin with WLNK followed by a sequence number.

Example: WLNK005 Fifth WYOLink project

Capital Improvement projects begin with PEB followed by a sequence number.

Example: PEB2022
